

Of particular importance is my experience of more than 15 years as researcher, consultant, expert in agricultural engineering, and team leader of a research team to carry out several studies and research within the framework of the implementation of various projects, I have extensive and comprehensive knowledge in the fields of agriculture in general (rural and nomadic communities), the agricultural sector (soil, irrigation and fertilizers) and related sciences. Conduct research and projects in the areas of rural development in the agricultural sector, water resources management, Irrigation Water Management, fertilizers, natural resources sustainability. Good experience in monitoring and evaluating emergency and development projects for poor communities. I hold a master degree in natural resources and sustainable management, from Hebron University in 2010. I had a large experience in conducting needs assessment, needed surveys, reporting, and data collection with good experience qualitative and quantitative data analysis. I had the ability to deal with the risks, ability to work independently while taking initiatives and showing a sense of responsibility, and ability to work under pressure, in a spirit of openness. I have Very good knowledge of Computer skills, in particular MS Word, MS Excel, MS Outlook, MS Project, SPSS and the Internet.
