Objective

A Data Science and Artificial Intelligence Engineering student with a background in Multimedia. I am seeking a training opportunity in programming to enhance my technical skills. I chose this field to excel in both programming and reading, as data science requires specialized academic study, while my passion for history and literature allows me to thrive through continuous research and exploration. My goal is to complete my education, obtain a master's degree, and establish my own company in the future. I am also highly proficient in the history of nations and reading.
