Oct. – Nov. 2016 AC	**Massachusetts Institute of Technology (MIT) Media Lab through Alison,** *Scratch* Completed the course of Scratch which is a graphical programming language developed at the MIT Media Lab. Scratch takes advantage of advances in computing power and interface design to make computer programming more engaging and accessible for children, teens, and others who are learning to program. The Scratch makes it easy to create interactive stories, animations, games, music, and art, and share these creations on the Web. Scratch is used worldwide to teach the basics of computer programming and as young people create and share Scratch projects, they learn important mathematical and computational ideas, while also learning to think creatively, reason systematically, and work collaboratively.
15/10/2016 AC	**The US Army Medical Department (AMEDD) Center and School through Alison,** *Diploma in Mental Health Studies* Completed the diploma, its' goal was to help me understand mental health and mental illness, as well as mental health practice and care in the community. It taught me how to tackle the issues of stigma and discrimination, to know why the promotion of mental well-being is important and the history of institutions and segregation. It also reviewed suicide and preventative treatment measures, how to manage violent patients and outlines the complex area of substance abuse. It helped me to understand defining characteristics of normal and abnormal behavioral tendencies. The range of personality disorders, phobias and neurotic behaviors are discussed together with the associated signs and symptoms. The

personal and occupational impact of burnout and depression are discussed along with the causes and identifiable signs and symptoms.
