## EDUCATION

### **2013-14                      University of Aberdeen                      MSc Oil and Gas Engineering**

Course included: Energy Technologies, Fundamental Concepts in Safety Engineering, Geosciences in Exploration and Production, Project Management, Oil and Gas Chemistry, Facilities Engineering and Flow Assurance.

Knowledge gained: Technology levers, geochemistry, basin analysis, exploration processes. Gained an extensive overview of well and reservoir engineering and the oil and gas sector.

Dissertation: "Subsea Leak Detection Technologies". The main object of this dissertation is to review subsea leak detection technologies available in the market and recommend a strategy that can be used in bridging the limitations/gaps identified in those technologies.

### **2011-12                      University of Leeds                      BEng Petroleum Engineering (First class)**

Course included: Reservoir Performance Modeling, Drilling and Production Technologies, Petroleum Reservoir Engineering, Petroleum Reservoir Architectures (Field class) and Formation Evaluation.

Project: the final design project of my undergraduate course was in a team of 8 and the key aims are to construct a North Sea offshore Brent type field reservoir development plan for a specific type of reservoir; design production and refining plants and plan for the facilities, logistics and economics. The project has increased my team working ability and improved my communication skills. I also, experienced project organization and management. From Drilling and production technology I'm enhancing my knowledge with regards to the techniques and equipment used in petroleum drilling.

### **2008-09                      Foundation Year at University of Leeds (AAB)**

Subjects: English, Physics, Physics Laboratory, Mechanics, Thermodynamics and Electromagnet.

## WORK EXPERIENCE

### **2006 -2007                      Phone shop Sales Assistant**

- Handling customer queries and complaints in a friendly manner.
- Advising customers about new products and promotions to achieve sales targets.
- Worked effectively under pressure during peak sale periods and promotions.
- Ensuring the till sales are processed and correct at the end of the day.
- This position allowed me to develop my customer service, communication, problem solving and team work skills.

### **2004-2006                      Supervision, Family construction business**

- Supervising and inspecting the works with a view to ensuring that they are carried out to the standard contracted for.
- Preparing weekly reports about the construction progress and ensuring work is carried out according to the project schedule.
- Providing workers with Food.

- Construction site supervision helped me to develop my communication, listening, performance management, relationship awareness between staff and client and time management skills.

## **SKILLS**

**Technical:** Advanced software skills, including all Microsoft applications, Roxar Tempest and PipeSim.

**Languages:** Fluent in English and Arabic.

**Communication:** I developed excellent communication skills both through working as a Phone salesman in Libya. Communication skills have also been vital in my role as team leader in my final undergraduate team project. My university course is also assessed on verbal communication, and I regularly give presentations of my work to my peers.

**Business awareness:** Gained an excellent understanding of the oil and gas sector and issues currently affecting oilfield production while undertaking the BEng programme in Leeds

**Teamwork:** I am proactive when working in a team and often take a lead role. For my final year group project, I took on the role of chairperson and was responsible for directing the group and ensuring we achieved a successful outcome and delivered the project on time.

**Problem solving:** While working in phone sales shop, my problem solving mindset ensured that I provided continually high standards of customer service when responding to queries or sourcing products in store. My problem solving skills have also helped me in dealing with customer complaints in a calm and rational manner.

## **PROFESSIONAL MEMBERSHIPS**

- I am an active member of the **Society of Petroleum Engineers (SPE)**; offering me a unique opportunity to contribute to the profession through programs and activities. Also enabling me to access journals and articles of the highest caliber, attend workshops and conferences concerned with the Oil and Gas industry. Also, network with professionals and students within my field and discuss the latest developments concerning the Oil & Gas industry.
- Energy Institute, UK.

## **INTERESTS/ACTIVITIES**

I am keen on sports in particular football, swimming and cycling where I have represented my school. I have organised football games and a tournament from which money was raised for Libyan crisis in 2011. Additionally, I enjoy travelling and have visited countries such as Turkey, Egypt, Tunisia and Morocco. From which I embraced many different cultures and met people from various backgrounds.

**Current Affairs:** Interested in keeping up to date with current affairs and particularly issues related to the environment and renewable energies to complement my current knowledge.

**REFEREES:** Available on request
