ITIAA :: Institute of Traditional Islamic Art & Architecture

M.A of Islamic Architecture

- *Contemporary Islamic house design and the issue of historical reference*

Thesis, about the issue of the contemporary Islamic design house and the importance of its historical reference in achieving a contemporary architecture for its activities. Emphasis the role of Islamic home architecture as a main tool may activate the sustainability in the Islamic societies these days. Reinvention the Islamic context culturally and as well socially is the essence for creating a contemporary architecture in Islamic world .Clarifying the related concepts involving design process such as: the tradition, the culture, the reference, the history, the potential meanings which make the space a specific place, and converge a house to a home is the first step in exploring the methods of contemporary design which may express the demands of the present days as well as the future without losing the values of the Islamic context.
