

Mohamad AL Refaei

Personal details:

Full name: Mohamad Abd Al Rahman Al Refaei

Place & Date of birth: Aleppo, 3/5/1995

Gender: Male

Nationality: Palestinian living in Syria

Marital Status: Single

Contacts:

Address: Arabic Syrian Republic, Aleppo, New Aleppo, AL Bohoth Association, B'7

E-mail: mohammadalrefaei@outlook.com

Phone number: (+963) 0954963197

Education:

School Diploma: Certificate of the General Secondary Education with a percentage of 96.41%.

I have studied in the NCD (National Center of Distinguished) in the tenth grade. The NCD is the most prestigious scientific school in Syria for the secondary education and- unfortunately- left it due to the conflict occurring in Syria but I continued to study in the ordinary secondary school which is itself a quite good.

I have studied two years at the faculty of medicine in the University of Aleppo (and of course I wish to study at a better University)

Scientific Activities:

In addition to studying in the NCD, joining the "Syrian Researchers" was one of the best events of my life which encourage me to "love" science rather than "like" it. "Syrian Researchers" is the biggest, most important, most influential, most reliable, Arabic, non-profit scientific organization which its goal is to introduce well-defined and easy-to-understand scientific articles to those who are interested in science but not specialist in it, and those articles, are of course rigorously checked.

For me, science is somehow an instinct so I am very interested in many fields of it, especially astronomy, evolution and medicine which is my passionate field.

The books of the history of science are also one of my beloveds.

Computer Skills:

Advanced: Word, Power Point

Intermediate: Excel

Language:

Native language: Arabic

Advanced: English

Basic: French

Hobbies:

I am a good soccer; in fact, I am the captain of the local football team. I am a good swimmer, too.

I am interested in arabic literature, especially that about history. What about English Literature? I would say immediately "scientific fiction novels are the best" followed by historic ones.
