- **Main duties performed:**
 - The field survey of the beneficiaries and determine the amount of water required.
 - Identify and design the dimensions and locations of reservoirs and placed.
 - Supervision and follow-up on the implementation of the reservoirs.
 - Educate beneficiaries on the mechanism of implementation of the projects and the importance of maintaining water projects to provide safe water to drink.
 - Weekly reporting and hand-funded project.
- 10- Consulting engineer in projects contracting community for a number of projects: construction projects, especially some small tanks villages and districts - the province of Rayma . [SFD]
- **Main duties performed:**
 - Receipt of the work submitted by the beneficiaries (contribution).
 - Determine the quantities of supervising the distribution of beneficiaries.
 - Supervision and follow-up on the implementation of reservoirs.
 - To solve problems and create a spirit of cooperation between people at work.
 - Raise the weekly reports and the hand-funded project.
- 11- Consulting engineer in the work of studies and field surveys in the field of rural development / labor-intensive works projects - Cash for work program . [SFD]
- **Main duties performed:**
 - Preliminary studies and work to raise the case of community.
 - Determine the need and type of intervention is possible to work program.
 - Determine the need and type of intervention is possible to work program.
- 12- Quality engineer, monitor and evaluate the contracts in the field projects - Cash for work program - Hodeidah . [SFD]
- **Main duties performed:**
 - Follow-up and evaluate the quality of work performed.
 - Raise the observations and recommendations to the Project Management.
 - Periodic regulatory reporting.

13- A consulting engineer for the work of preliminary studies for a number of rural schools (Bora + Rayma) . [SFD]

▪ **Main duties performed:**

- Surprise visit to the site and collect information directly from the site.
- Determine the need (Create - restoration – added).
- Preparation and reporting.

14- Survey engineer work carried out for a number of water projects - Raymah Governorate . [SFD]

▪ **Main duties performed:**

- Raise the nature of the work carried out and compared schedules of quantities and design matched drawings.
- Prepare and submit reports on inventory.

Languages

- *Arabic: Mother language.*
- *English: speaking and writing (intermediate)*

Skills

- *Prepare (studies - designs and graphics - Specifications - Calculate quantities and estimated of cost).*
- *Direct supervision of the implementation of the projects.*
- *Preparation of preliminary studies for community projects and rural development.*
- *The ability to adapt in the workplace (city or rural areas) and the ability to communicate and work in team spirit .*
- *Solving problems and dilemmas and the ability to work under extreme pressure.*
- *Excellent computer skills in Microsoft Applications , particularly Excel ,and KOBO tool box.*
- *Experience in working with organizations and non-governmental bodies.*
- *Ability to take initiative, flexibility and willingness to learn.*
- *Ability to work outside of regular working hours.*
- *Ability to write reports .*
