From some of my projects

Project (1)

University Student Affairs System

Project Description

It is a system that conducts academic operations for students during the period of study until graduation, where it records the data of colleges and departments and student results and review and display reports of the results of each student and It is characterized by all the powers of users

start date	03/2010	05/2010
end date		
Preliminary study	2 weeks	
System analysis	2 weeks	
System design	2 weeks	
Programming:	2 weeks	
Tasks Type	Introductory study, system analysis, system design,	

	programming, implementation
Methodology & Method & Tools	<p>Methodology: Methodology of analysis and structural design Method: The method of advancement Tools:</p> <ul style="list-style-type: none"> • Methods of information collection (interview – questionnaire - monitoring - analysis of documents) • BFD function diagram • DFD data flow charts • Relational entity model E-R-MODEL • Relationships Schema • Programming Language (C#) • Microsoft Access Database • Design of user interfaces • .Net Framework

Project (2)

System of institutions buying and selling cars (used)

Project Description

It is an accounting system for owners of used car showrooms and dealers. As customers and suppliers, and all internal processes that take place between the various departments of the company in terms of documentary cycle and tight control and It is characterized by all the powers of users Has been analysis, design, programming and installation , (system of buying and selling used cars) And I have certificate of thanks and appreciation In the success of this project after its implementation From(Gulf King For Cars Trading Yemen Sana'a).

start date	11/2011	05/2012
end date		
Preliminary study	3 weeks	
System analysis	5 weeks	
System design	4 weeks	
Programming:	7 weeks	
Implementation	3 weeks	
Tasks Type	Introductory study, system analysis, system design,	

	programming, implementation
Methodology & Method & Tools	<p>Methodology: Methodology of analysis and structural design Method: The method of advancement Tools :</p> <ul style="list-style-type: none"> • Methods of information collection (interview - questionnaire - monitoring - analysis of documents) • Algorithms • BFD function diagram • DFD data flow charts • Relational entity model E-R-MODEL • Relationships Schema • Programming Language (C#) • Oracle Database 10g • .Net Framework • Design of user interfaces

Project (3)

Hotel Management System

Project Description

It is a partial computerization of operations within the hotel where five main systems will be established and each system performs a set of operations and keeps some operations for the user to do their work manually, these systems are as follows:
