Sousse, Tunisia

Professor of Computer Science

Personal statement

Given my passion for computer science and teaching, I obtained higher education degrees in computer science. I also focused on coaching in personal development and had the chance to appraise my knowledge in the new pedagogies and innovative tools of teaching to help my students improve their academic levels and self-confidence, and to present the results in the International Education Fair of Sfax (2017) and in the Salon of Young Innovators and Inventors of Sousse (2019).
