MEDICAL BIOLOGY

NEBRAS RADA MOHAMMED

Molecular biology was first used in 1938 by Warren Weaver. As director of the natural sciences section of the Rockefeller Foundation, he advocated that financial support be given to this "new branch of science- a new biology-Molecular Biology". By the time, biochemists began to discover many fundamental intracellular chemical reactions and to appreciate the importance of specific reactions and of protein structure in defining the numerous properties of cells □□ www.lulu.com □ ISBN □ 978-1-71676-186-7 □ Imprint: Lulu.com
